Dear Hiring Manger,

I am writing to you regarding the online web designing and development Internship role that opened recently. I came across the Internship description on facebook.com and was delighted to find that my academic accomplishments meet all the necessary requirements. I am seeking a challenging but rewarding internship, which is why I was drawn to this exciting opportunity.

As a current software engineering student at the National School of Computer Science, I have acquired skills in software development, web application development, Object Oriented Programming, and database systems. Currently I served as an organizer of TuniHACK Hackathon and as a project team member in Open Source ENSI Club, in this position I teach the participants the basics of HTML/CSS, PHP and serve as a mentor to help them accomplish the given project. The engagement in these activities has not only helped me to develop an important ability to function well as a team member and as a mentor but also taught me how to take a lead and finish any assigned task or project.

I believe I would make an excellent addition to your team. This internship would help me grow my real-world experience in the technology industry and help me further develop and refine my skills.

I welcome the opportunity to speak with you about my qualifications and look forward to hearing from you. Thank you for your consideration.

Sincerely,
Sana Anes
